FROM THE PRINCIPAL'S DESK

"If you are planning for a few years, grow crops. If you are planning for a hundred years, grow trees. And if you are planning for thousand years, educate your children. " Education is a power to think clearly, the power to act well in world's work and the power to appreciate life: Indeed our children are the future of this country and civilization. What we give them today would yield rich dividends in future.

During such trying times of a pandemic COVID-19, Kendriya Vidyalaya Pitampura believes in optimistic approach and says "Learn to beat the odds in life and have strength to endure them. Here, rote learning is discouraged and children get a new horizon of education. The students get a chance to come forward and speak their minds which gives them a sense of respect and dignity. With the help of online studies through different portals like google classroom , Gmeet , teachers have left no stone unturned in their efforts to continue doing the same and this newsletter is an insight into that idea.

I wish all the best to the primary department for their endeavor.
Stay safe, stay healthy!!

ANJALI THAKKAR

ONLINE CLASSES

Online Classes

Children are always amazing! But the last four months have pushed teachers and students to a new level of being a HERO! This year, they have gone the extra mile with virtual classrooms and online learning sessions at home just to ensure the continuity of learning. The medium for the classroom is virtual in the pandemic period, but the learning remains the same. Explanations with power point presentations and PDFs of the lessons, debates, discussions and conclusions made the learning process swift and meaningful. We would like to thank our parents who have supported and appreciated the teachers' efforts for taking online classes and bringing the best out of the children.
